"The Interparliamentary Union, now was embed in London, expresses the view that the second Hague conference should—

ence should—
"First. By treaty define contraband of war as being restricted to arms, munitions of war and explosives.
"Second. Reassert and confirm the principle that neither a sidp\_carrying contraband of war nor other goods aboard such ship, not being contraband of war, may be destroyed.
"Third, Affirm that even between belligerents private property should be as immune at soa as it is on land."
The conference also adopted a resolution in favor of the discussion by "The Hague conference of means to cut down the "intolerable expenditure on armaments."

## Do it Now! Don't Wait Until It's Too Late!

EEP your body clean Most people are very neat and clean in their outward A appearance, but how about the Are you clean inside?

And if not, how can you face the world with clean thoughts, clear intelligence, a fair, just, bright mind and get your full share of capacity for work and enjoyment?

Neglect of exercise, rich over-feeding and carelessness about stools, often leave the delicate internal mechanism in a

pasty mess. The small intestine is compelled to absorb the poison of decaying matter instead of wholesome nourishment.

The liver gets inactive: the bile doesn't "work off"; the eyes get yellow; the skin gets dead like putty and pale like dough, listigured with boils, pimples, blackheads und liver-spots.

There's only one solution to the probem: Keep clean inside all the time. That's the answer.

If you can not diet, or keep your mechinism going by proper exercise, take Casparets, the sweet, fragrant, harmless little on your bowels, and gently but powerfully plean out and disinfect the whole digestive tanal.

A Cascaret every night before going to ped will "work while you sleep" and nake you "feel fine in the morning."

If you have been neglecting yourself for some time, take a Cascaret night and morn-'ng and break up the "constipated habit" without acquiring a "cathartic habit,"

Cascarets are sold by all druggists, 100, 25c and 50c. The 10c size trial box is a peat fit for the vest pocket or lady's purse.

rial impairment of the public convenience by this action, as the Locomotive Works reserved the right to construct any number of tracks across the extension of the street, and to lay culverts and pipes and to build cellars. The company aircady has a large number of tracks in railway use, and is now about to build a long culvert through which to direct the course of Shockee Creek.

To Be Large Building.

The steam shovel plant is to be erected on the east side of Seventh Street, across on the east aide of Seventh Street, across the street from the present shops. It will be 172 feet in width, and 450 feet long. It will be built in three bays (or in a layman's phrasing, three long shops). The two outside bays will be 49 feet wide, and 32 feet high, and willirun the full length of the building. The central bay will be 74 feet wide, 45 feet high and 450 feet long. The central bay will be wised for putting together the steam be used for putting together the steam be used for putting together the steam shovels, and, in addition, will be used to build locomotive tenders, tanks and trucks. The side bays are to be used to build locomotive tenders, tanks and trucks. The side bays are to be used for the care of the work, both on tenders and on the steam shovels. From these new shops, two cranes, 30 feet high, with a 66 foot span, will be run across Seventh Street to the present shops. These cranes are to be used for the handling of crude and semi-finished material for the steam shovel plant, and will be built with the tremendous capacity of ten tons. In addition to all this work, Shockoe Creek, which runs directly through the land upon which the new plant is to be erected, will be enclosed and its meandering length run through a 1,100-foot culvert, to be built of cement, extending from Hospital Street, in front of the Locomotive Works, under the Valley-Road, and through about 500 feet of the Locomotive Works, under the Valley Road, and through about 500 feet of the American Locomotive property, and connecting with the culvert under the tracks of the Chesapeake and Onio Railway. The contract for this work has been awarded to Mr. John T. Wilson, at a cost of \$22,000.

The management is now working on the plans and specifications; the contract will soon be awarded, and the plant will be ready inside of five months. And out-

200 feet high, which will be the highest stack in Richmond. The contract for this work will be let in the course of a week. Further than this, the company has determined to put in storage room for carrying a stock of coal, the storage to have the capacity for 10,000 tons. This coal will be hundled altogether by mechanical means, so that the cost of unloading, storing and feeding in bollers will be less than 10 cents per ton. In order to do titls it will be necessary to put in a cran runway, which will have a pan of 75 feet and be 50 feet high. This will be exceeded on the north side of Valley road, on the north side of the Locomotive Works. Its capacity will be a ton and a half at a time.

Character of Work Done.

### Character of Work Done.

In connection with the outline of the work being done at the Richmond Loco motive Works and its extensive improvements now under way, it might be proporto say that the character of the locomo ments now under way, it might be proper to say that the character of the locomotives turned out by these works is thoroughly appreciated by the railroads of the country, and it not only compares favorably with that of other plants, but mas a recognized superiority. One, reason for this, as stated by Shop Engineer V. Z. Caracristi, is that every employe of the works takes an individual interest in the work turned out. Mr. Caracristi has charge of the work of construction, which is to be started at once. The shovel plaint will have a capacity of 200 a year, which will be one of the fargest outputs anywhere in the sountry.

It might be interesting to know that the Lecomotive Works covers about thirty acres, has about ten acres, or, perhaps more, of roofing, and has in the various buildings about two and a half acres of glass. The works now employ 3,500 hands, which will be largely increased. It is the largest factory of its kind in the South, and one of the largest and best in the whole country.

Fighting Lasted Thirty Minutes, After Which Live Pulajanes Took to Heels.

(By Associated Press.)

MANTIA. July 25.—Advices received here from the Island of Leyte say that a large band of Pulajanes yesterday attacked a column of constabulary and regulars, commanded by Capitain George II. McMaster, of the Twenty-fourth Infantry. The engagement, which took place near Baneun, resulted in the Pulajanes being repulsed, with the loss of fifty men killed and sixty wounded. The troops and constabulary suffered no losses. The Pulajanes fied, with the column in pursuit of them.

Later estimates place the number of the Pulajanes' dead and wounded at 150. The fight took place in thick underwood and lasted thirty minutes. The Pulajanes, who are said to have numbered 500 men, armed with gains and bolos, charged the American column three times. The latter was composed of fifty constabulary, commanded by Captain Noville, and twenty-fourth Infantry, commanded by Captain McMaster.
